

BlueNautics

Your Accountable Execution Partner from
Concept to Delivery

Sourcing & Business Development | Apparel | Garments

Who is **BlueNautics**

For years, the equation seemed simple : Bangladesh offers skills and craftsmanship. North America offers demand. Yet something always lost in translation.

A PhD candidate in artificial intelligence observed this gap from his University library. He understood the numbers:

- 56% of projects fail due to poor communication
- 20% of margins are lost to quality gaps

He also understood something textbooks couldn't teach: his father had spent nearly 4 decades mastering the other side of the equation.

His father had built two factories of his own and served as a sourcing advisor to nearly twenty more — commanding a network of skilled workforce and a secured China-based supply pipeline few others could access. The resources are there. The demand is there. What is missing is a connective tissue.

BlueNautics is that connective tissue. We are building not with spreadsheets and supplier lists, but with workflow that translates intent into timely and best quality execution, expertise that catches defects before shipping and a single point of accountability that North American brands could trust.

WHO WE ARE

BlueNautics is an end-to-end apparel sourcing and production coordination partner connecting North American buyers to Bangladesh's advanced manufacturing ecosystem.

We are your **managed execution layer**—not just a middleman or directory of suppliers

Our sourcing and production coordination model is specifically designed to **address the recurring pain points** in apparel sourcing and supply execution

APPAREL BUSINESS CHALLENGES

Global Apparel Sourcing Fails in Predictable Patterns

Communication Breakdown

56% of projects fail due to miscommunication across time zones and cultures

Quality Inconsistency

Quality issues consume **15-20%** of sales revenue in typical sourcing relationships

Timeline & Budget Overruns

51% of sourcing projects are classified as "**challenged**" with delays and cost overruns

Execution Gaps

Only **31%** of projects succeed fully—meeting scope, time, and budget targets

Context Misalignment

"They did what we asked—not what we meant." **Lost in translation costs you money**

BlueNautics is engineered to mitigate these risks before they impact your operations and margins

OUR RISK-MITIGATION EXECUTION FRAMEWORK

**A structured framework
designed to mitigate
recurring apparel
sourcing risks
directly**

North American Context Interpretation

North American business interpretation combined with South Asian execution eliminates context misalignment from concept through final delivery

Execution-First Model

An execution-first model with continuous monitoring closes operational gaps between planning, production, and final delivery

Front-Loaded Costing

Front-loaded costing and milestone tracking reduce timeline delays and budget overruns across sampling and production phases

Early Feasibility Checks

Early feasibility validation and staged QA checkpoints prevent quality inconsistencies during bulk production

One Accountable Layer

A single accountable coordination layer ensures clear communication across time zones, stakeholders, and production teams

OPERATIONALIZING THE RISK-MITIGATION FRAMEWORK

Predictable Execution |

Transparent Communication |

Continuous Accountability

01

Discovery

Feasibility validation, front-loaded costing analysis, and technical requirement alignment to prevent early-stage execution risks.

03

Production

Raw material verification, continuous in-line production monitoring, and milestone-based progress tracking.

02

Sampling

Iterative prototyping, design refinement, and feasibility-aligned pricing finalization with vetted raw material & manufacturing partners.

04

Delivery

Comprehensive pre-shipment inspection, logistics coordination, and final delivery verification to ensure quality and timeline compliance.

A phase-gated workflow designed to systematically mitigate sourcing risks from concept to delivery

PRODUCT CATEGORY

From high-volume essentials to complex technical garments – delivered through a curated manufacturing ecosystem.

MANUFACTURING ECOSYSTEM

Our ecosystem-driven model transforms fragmented sourcing into a controlled, transparent and compliance-aligned execution system from material selection to final delivery.

Raw Material Ecosystem : Verified Raw Material Sourcing

- Vetted fabric mills and trim suppliers aligned with buyer specifications
- Access to China-based material sourcing
- Consistent quality alignment through sampling and PP (Pre-Production) approvals

Vetted Raw Materials

Factory Network : Strategic Production Network (Bangladesh)

Export Ready Factories

- Partner factories specializing in Knit, Woven, Home Textile, and Caps/Headwear
- Export-oriented units with experience serving North American & EU buyers
- Supported by on-ground coordination and continuous factory communication

Compliance Certifications: Compliance-Driven Manufacturing

- List of compliance certifications across our factory network:
 - amfori BSCI • Sedex (SMETA) • RSCGOTS • GRS • OBCS • OEKO-TEX® Standard 100
 - ISO 9001 • ISO 14001 • ISO 45001
 - Buyer Code of Conduct (COC) Aligned Units

Compliant
